Why Connex?

Our quotation process is completely **free of charge** for all clients.

We are a multidisciplinary business which seeks to understand the unique requirements of every project, and every budget. Our experienced technicians complete the installation in accordance with the quotation, with a particular attention to safety and quality.

Our work is fully certified and is documented end-to-end, including;

Fluke tests for fibre and copper	TCA 1 forms & compliance documents
Manufacturers warranties	Detailed PDF plans of works completed

Data & Telecommunications

Connex Solutions are a leading provider of telecommunications services Australia-wide. We specialise in the design, installation, maintenance, fault diagnostics & emergency repairs of all fibre optic and copper systems.

We partner with many External IT Providers to deliver telecommunications networks which simplify the process for clients and add value for providers.

Our partnership process is critical for the implementation of an integrated and future proof system that remains robust and expandable.
